ELSEVIER

Int. J. Miner. Process. 47 (1996) 285

INTERNATIONAL JOURNAL OF MINERAL PROCESSING

Contents of Volume 47

Research papers

Energy transformations in a planetary grinding mill. Part 1. General treatment and model design
A.S. Kheifets and I.J. Lin 1

Energy transformations in a planetary grinding mill. Part 2. Model verification
A.S. Kheifets and I.J. Lin 21

Oxygen reduction at sulphide minerals. 2. A rotating ring disc electrode (RRDE) study at galena and pyrite in the presence of xanthate
E. Ahlberg and A. Elfström Broo 33

Oxygen reduction at sulphide minerals. 3. The effect of surface pre-treatment on the oxygen reduction at pyrite
E. Ahlberg and A. Elfström Broo 49

Cone beam X-ray microtomography for three-dimensional liberation analysis in the 21st century
C.L. Lin and J.D. Miller 61

Convection and diffusion limited aeration during biooxidation of shallow ore heaps
R.W. Bartlett and K.A. Prisbrey 75

Improved comminution efficiency through controlled blasting during mining
G. Chi, M.C. Fuerstenau ua, R.C. Bradt and A. Ghosh 93

A model for slurry rheology
F.N. Shi and T.J. Napier-Munn 103

Observability of systems involving flow circulation
J. Ragot, M. Luong and D. Maquin 125

Role of dispersants in kinetics and energetics of stirred ball mill grinding
P.C. Kapur, T.W. Healy, P.J. Scales, D.V. Boger and D. Wilson 141

Measuring the rheology of slurries using an on-line viscometer
F.N. Shi and T.J. Napier-Munn 153

Axial velocity profiles of single bubbles in water/frother solutions
A. Sam, C.O. Gomez and J.A. Finch 177

Behaviour of amylopectin and amylose components of starch in the selective flocculation of ultrafine iron ore
P.K. Weissenborn 197

The effect of polymeric dispersant on magnetic separation of tungsten ore slimes
R.P. Bhagat and P.N. Pathak 213

Dissolution kinetics of natural FeS_2 in carbon tetrachloride and water–carbon tetrachloride media saturated by chlorine
Y. Kadioğlu, S. Bayrakçeken and S. Çolak 219

Separation data balancing utilizing the maximum entropy approach
A.I.A. Salama 231

Swirl flow characteristics and froth phase features in air-sparged hydrocyclone flotation as revealed by X-ray CT analysis
A. Das and J.D. Miller 251

On-line measurement of viscosity and determination of flow types for mineral suspensions
S.K. Kawatra and A.K. Bakshi 275

Contents Volume 47 285
